COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

OFFICERS OF THE INSTITUTION.

Patron.—CHESTER A. ARTHUR, President of the United States.
President.—EDWARD MINER GALLAUDET, Ph. D., LL. D.
Secretary.—ROBERT C. FOX, Esq.
Treasurer.—E. FRANCIS RIGGS, Esq.

Director.—HON. THOMAS P. RAYARD, Senator from Del.; HON. JOHN A. KASSON, M. C., from Iowa; HON. J. RANDOLPH TUCKER, M. C., from Va.; representing the Congress of the United States. HON. HENRY L. DAWES, of Mass.; HON. WILLIAM E. NIBLEY, of Ind.; REV. BYRON SUDDERLAND, D. D.; JAMES C. MCGUIRE, Esq.; WILLIAM W. CORCORAN, Esq.; HON. W. MCKEE DUNN.

COLLEGE FACULTY.

President and Professor of Moral and Political Science.—EDWARD M. GALLAUDET, Ph. D., LL. D.
Professor of Mental Science and English Philology.—SAMUEL PORTER, M. A.
Professor of History and Languages.—EDWARD A. FAY, Ph. D.
Professor of Natural Science.—REV. JOHN W. CHICKERING, Jr., M. A.

Professor of Mathematics and Chemistry.—JOSEPH C. GORDON, M. A.
Assistant Professor of History and English.—J. BURTON HUTCHINS, M. A.
Assistant Professor of Mathematics and Latin.—AMOS G. DRAFER, M. A.
Instructor in Gymnastics.—JOHN J. CHICKERING, R. A.
Instructor in Drawing.—ARTHUR D. BRYANT, B. Ph.

FACULTY OF THE PRIMARY DEPARTMENT.

President.—EDWARD M. GALLAUDET, Ph. D., LL. D.
Instructor in Articulation.—MARY T. G. GORDON.

Instructors.—JAMES DENISON, M. A., Principal; MELVILLE BALLARD, B. S.; THEO. DOREA KISER, B. Ph.; Mrs. E. S. DAVIS.

DOMESTIC DEPARTMENT.

Supervisor.—JOHN B. WIGHT.
Attending Physician.—N. S. LINCOLN, M. D.
Matron.—MISS ELLEN GORDON.

Assistant Matron.—MISS MARGARET ALLEN.
Master of Shop.—ALMON BRYANT.
Steward.—H. M. VAN NIESS.
REPORT.

COLUMBIA INSTITUTION FOR THE DEAF AND DUMB,
Kendall Green, near Washington, D. C., October 31, 1882:

SIR: In compliance with the acts of Congress making provision
the support of this institution, we have the honor to report its progr
during the year ending June 30, 1882:

The pupils remaining in the institution on the 1st of July, 1881, numbered:
Admitted during the year: .................................................................
Since admitted: .................................
Total: .................................................................

Under instruction since July 1, 1881: Males, 94; females, 17. Of th
51 have been in the collegiate department, representing 20 States of
the Federal district, and 60 in the primary department. A list of the
names of the pupils connected with the institution since July 1, 1881
will be found appended to this report.

HEALTH OF THE INSTITUTION.

General good health has prevailed in the institution since the date
our last report. A case of scarlet fever made its appearance during
the month of May in the family of one of our instructors residing
at the institution. The child, with its mother, was promptly removed
from the building, and no spread of the disease followed.

The prevalence of small-pox in parts of the country not far from
Washington suggested the desirability of a general vaccination of
the residents of Kendall Green. Vaccine matter was procured from Z.
Gilman, of Washington, prepared by Drs. Robbins and Lewis, Brook-
lyn, N. Y., and applied to more than one hundred persons. In only one
case did the operation prove successful.

Application was then made to Dr. Ralph Walsh, of Washington,
who, starting from his vaccine farm in the vicinity of the city. The same
persons were again operated upon, and with scarcely an exception complete
vaccination was the result.

One pupil only, Miss Alice Turner, has died since the date of our last report. Miss Turner had been connected with our primary depart-
ment for fourteen years, and was a young woman of quick mind and irresistable character. Her death, which occurred at her home just at the
close of our school year, was caused by pulmonary consumption.

DEATH OF MISS ANNA A. PRATT.

We are also called to mourn the loss of one who had filled an impor-
tant position in the institution for many years, and who was greatly loved by both pupils and officers.

On the 9th day of March last Miss Anna A. Pratt, for fourteen years matron of this institution, ended her earthly labors after a short illness. Her health had been feeble for more than a year, and but a few weeks
before her death she tendered her resignation, feeling that she was no longer able properly to discharge her duties. But her services were so highly regarded that her resignation was not accepted, and an arrangement was made for a considerable reduction of her responsibilities and cares, in the hope that with rest her strength might be restored. It was soon apparent, however, that her constitution was hopelessly undermined, and she sank rapidly from what seemed at first a light attack of catarrhal pneumonia. To all who came under her care Miss Pratt was a true mother. Pupils and officers looked to her as such, and appealed to her in any emergency, sure of being met with that kindly interest and sympathy which can only come from the maternal heart. And it was not at moments of unusual need alone that her motherly care was manifested, but at all times as the movement of domestic life of Kendall Green went on was her influence felt. No one can ever surpass Miss Pratt in conscientious devotion to duty; no one can ever fill more successfully than she did the arduous and delicate position she was called upon to occupy. Her record is complete, and she will ever be remembered by those who knew her as one deserving of their highest respect and warmest affection.

The position made vacant by the death of Miss Pratt has been filled by the appointment of Miss Ellen Gordon, lately of Exeter, N. H., and the ability shown by her during the few months she has acted as matron give excellent promise of success in the future.

COURSES OF INSTRUCTION.

The work of instruction in the several departments of the institution has proceeded with no essential changes. The number of pupils taught articulation has been increased, and the result of this branch of instruction has been encouraging.

Classes in drawing have been taught in the college and in the primary department by Mr. Arthur D. Bryant, a graduate of the college in 1886. Mr. Bryant’s methods have proved eminently successful, and the progress made by the pupils has been in every respect satisfactory.

PHYSICAL TRAINING.

The results growing out of the work done in our new gymnasium have been most gratifying, whether they are regarded from a moral or a physical point of view. The morale of the institution was never as high as during the past year.

The instances where discipline became necessary have been very few as compared with former years, and the reactive effects of an improved physique on the mental and moral faculties has been markedly favorable in many instances.

During the six months from November 1 to May 1, all the students of the college and the older boys from the primary school were required to spend four hours a week in active gymnastic exercises, viz., an hour on Monday, Tuesday, Thursday, and Friday of each week.

These exercises consisted of dumb-bell practice, in concert, intended to open the lungs, stir the blood, and set in motion the whole body, and in the development of special muscles by the use of a number of ingeniously-prepared machines, designed and furnished by Dr. D. A. Sargent, the director of the gymnasium of Harvard University.

The dumb-bell exercise was acquired with great readiness, and given
with precision, the idea of rhythm and time in marching being conveyed by the assistance of drum-beats.

The great benefit arising from the use of the special apparatus has been clearly shown in the uniform increase of chest girths, arm girths, &c., in the erect carriage and springy step of the students, and above all in the desire for regular exercise, as shown in their work on days when the exercise was not compulsory.

The physique of each student was carefully recorded in a series of forty-two measurements taken at the beginning and again at the end of the season. The average chest girth of about fifty young men showed the following gains:

<table>
<thead>
<tr>
<th></th>
<th>November</th>
<th>May</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inflated</td>
<td>.887</td>
<td>.916</td>
</tr>
<tr>
<td>Repose</td>
<td>.853</td>
<td>.864</td>
</tr>
</tbody>
</table>

The measurements given are decimals of a meter.

The greatest gain in chest girth was:

<table>
<thead>
<tr>
<th></th>
<th>November</th>
<th>May</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inflated</td>
<td>.890</td>
<td>.972</td>
</tr>
<tr>
<td>Repose</td>
<td>.895</td>
<td>.919</td>
</tr>
</tbody>
</table>

Some interesting cases occurred of the development of limbs into symmetrical proportions where marked discrepancies existed when the first measurements were taken.

A single illustration will be sufficient:

<table>
<thead>
<tr>
<th></th>
<th>November</th>
<th>May</th>
</tr>
</thead>
<tbody>
<tr>
<td>Right calf</td>
<td>.377</td>
<td>.398</td>
</tr>
<tr>
<td>Left calf</td>
<td>.374</td>
<td>.392</td>
</tr>
<tr>
<td>Upper right arm</td>
<td>.297</td>
<td>.305</td>
</tr>
<tr>
<td>Upper left arm</td>
<td>.300</td>
<td>.305</td>
</tr>
</tbody>
</table>

TWENTY-FIFTH ANNIVERSARY.

It was on the 23d of February, 1857, that the act of Congress incorporating the institution was accepted and made the basis of their organization by the board of directors. The recurrence of the twenty-fifth anniversary of that day was deemed a fitting occasion on which to invite the President and other prominent officers of the Government of the United States to visit the institution and see something of its workings.

In response to invitations, the President of the United States, the acting Vice-President, the Speaker of the House of Representatives, the Chief Justice of the Supreme Court, the Secretaries of State and War, the Attorney-General, the Postmaster-General, the chairmen and several members of the Committees on Appropriation, the Comptroller and First Auditor of the Treasury, with ladies accompanying them, spent the evening of February 23rd last at the institution. They were received by the president and directors of the institution and its officers, in the gymnasium, where an exhibition of athletic exercises was given. The company then passed through the college building to the chapel, where the pupils of the primary departments and the students of the college gave evidence in various exhibitions of the attainments they had made. The exercises were concluded with a pantomime which had been prepared by one of the students of the college, and was given by several of the young men. The visitors expressed great delight and surprise at the progress which had been made by the pupils and students.
COLUMBIA INSTITUTE FOR THE DEAF AND DUMB.

EXERCISES OF PRESENTATION DAY.

The exercises of the regular public anniversary of the college took place on the 3d day of May. In the absence of the President of the United States, ex-officio patron of the institution, the Speaker of the House, Hon. J. W. Keifer, called the assembly to order. Expressing his hearty interest in the institution and his regret that he would not be able to remain through the exercises, Speaker Keifer, in a few felicitously-chosen words, invited Hon. George Bancroft, the eminent historian, to take the chair. The exercises were then opened with prayer by Rev. William A. Leonard, D. D., rector of Saint John's church. The candidates for degrees presented essays as follows:

Oration—Progress of Agriculture. Lars Larson, Wisconsin.

Dissertation—Was America discovered by the Northmen? George Layton, West Virginia.

Oration—Contributions from the New World to the Old. Thomas Hines Coleman, South Carolina.

Messrs. Coleman, Zeigler, Larson, and Van Damme were then presented by the president of the college to the board of directors as candidates for the degree of Bachelor of Arts, and Messrs. Dougherty, Layton, and Saxton for the degree of Bachelor of Science.

The honorary degree of Master of Arts was conferred on Lars A. Havstad, of Christiania, Norway, a deaf-mute, who had made unusual acquisitions in science and letters.

Rev. William C. Cattell, D. D., LL. D., president of Lafayette College, then delivered the following address on—

A LIBERAL EDUCATION.

The National College for Deaf-Mutes has a deeper significance than other philanthropic institutions founded to ameliorate the condition of those deprived of hearing and speech. Any institution with this general aim would indeed enlist our profoundest sympathy; for our hearts go out in tender and loving interest towards those brothers and sisters of ours who are deaf or blind—in our Father's house they seem so near to us and they are so far away, in their rayless or silent land, from the high privileges of our common home. And we not only admire and applaud the private philanthropy that holds forth to them its helping hand, but likewise all well directed appropriations for their benefit from the public funds; men who most critically examine the legality and exigency of appropriations from the public treasury—State or national—as they read these appropriations for the blind or the deaf, find their hearts beating faster with generous delight.

But "The National Deaf-Mute College," organized in 1854, means something more than "The Columbia Institution for the Deaf and Dumb," previously established, or any similar institution having in view the general philanthropic object to better their condition. The distinct and definite aim of every college is to afford liberal culture; and while the establishment of this college by Congress emphasizes the value our national legislature places upon those liberal studies which lead to academic degrees, it marks also a great and important advance in the education provided for deaf-mutes, an advance not only in degree, but in kind. These noble buildings, all this generous scientific equipment, this large faculty of able and distinguished scholars—all this assures us not only of the increased thoroughness and breadth, and efficiency of the special instruction here given to the deaf-mute; but also that, in its enlarged range of instruction, are now included those liberal studies which have for generations attracted the aspiring scholar to the academic groves of Harvard and Yale.
It is therefore no longer a disputed question whether the deaf-mute can or ought to enter upon studies which have for their object something more than to enable him to converse by writing in the absence of articulate speech, or to fit him for some employment by which he may earn his living. Elementary and practical studies are of course of the utmost importance for him as they are for all others; they lie at the very base of all education. But the liberal training which the college gives is yet separate and distinct in its aim, and to some extent in its methods, from that which is given in all other schools, and the day has come for the deaf-mute when there is provided for him a complete college curriculum, leading to the usual academic degrees, and committed to teachers who are not only distinguished for their general culture and scholarship, but who are eminent specialists in the peculiar methods by which all instruction must be communicated to him. And it is high honor for our country that it has led all other countries in this movement. This college for deaf-mutes will always enjoy the proud distinction of having been the first established; as yet, it is the only one.

In responding to the kind invitation of your president to attend the exercises upon this day of presentation for academic degrees, and to offer some remarks, it seems to me not inappropriate to the place and hour to suggest some thoughts upon "liberal education." I do not propose, indeed, to attempt a full exposition of the subject, or to enter upon any formal discussion of the important principles involved in it, but to employ the brief time at my disposal in making some general observations upon this wide theme.

Cicero defines a liberal education to be that which is suited to the character and position of a liber or freeman as distinguished from the slave. In his view, which was the general opinion of the age in which he lived, all manual labor, all gainful pursuits, whether mechanical or industrial, were degrading to those of noble birth, who, freed from such sordid occupations and cares, should be educated to discharge with dignity the duties and obligations of their high positions in the state. It is true these duties were pretty much summed up in making a ringing speech in the senate, in taking a creditable part in philosophical and literary discussions, and most of all, perhaps, in being a good fighter, for the Roman empire was almost continually engaged in war. It was for the slaves to work in the fields or at the trades. Happily this view of labor no longer exists; it is, indeed, essentially opposed to that which now prevails, especially in our own country, where all honest labor is rightfully held to be honorable—"a man's a man for a' that." We have come to a better understanding of what true manhood is, and of what the duties and obligations of freemen really involve; and this higher appreciation of the nature and dignity of man himself, without regarding his position in a privileged class, has led the American people not only to recognize the respectability of all honest labor, but also to insist upon the value and necessity of education, not for the privileged few as their birthright, but for all.

Education, in fact, has come to be one of the enthusiasms of this, perhaps, the most practical country of this practical age; the popular enthusiasm upon this subject is something like the exultant triumph of victors after a hotly contested battle has been fought and won. For not without a great struggle did the principle of education for the masses become the settled policy of governments. "I thank God, said one of the early governors of an American province, "there are no free school or printing, and I hope we shall not have them these hundred years. God keep us from both!" And so thought and spoke, less than two centuries ago, other governors and men in high places who, upon the subject of education for the masses, seem to have made but little advance from the position taken by Cicero before the Christian era: but in the present age such men are classed with the pre-adamite fossils. It was to a generation that has already passed away that Lord Brougham uttered the memorable and exultant words, "The schoolmaster is abroad!"

But when we come to inquire what it really is that education aims to secure, we shall find conflicting views—not merely as to its methods and appliances, but as to the definite and determinate end which it has in view. Even the derivation and meaning of the word is in doubt, whether we shall regard it as from dido, to lead forth, or draw out; or from the kindred office, to nourish or rear as a nurse cares for one committed to her charge. Varro makes the distinction between these two words, educi obstetric educat nutrix, and, as the function of the teacher, he adds docet magister. The meaning of each of these words, dido and edax, (which are in fact interchangeable in classical Latin), is employed by the advocates of the different theories of education, which have given rise to such prolix discussion at the present day.

There are some who are satisfied with the education which is simply instruction, whose only aim is to render it easier and more certain for a man to earn his living. This is certainly a most desirable result to be secured. I have no sympathy with those who speak contemptuously of this as a "bread and butter" education. We pray for our daily bread; it is an equally solemn duty to prepare ourselves, as best we may in God's Providence, to earn it.
There are others who look beyond this narrow range, and who regard education as that which imparts the knowledge and develops the faculties and powers by which success is conquered upon broader and nobler fields than those occupied by men who are merely struggling for a living; it is by education that men secure high place among their fellows and are able to keep it; or they secure great wealth or whatever else may give them power.

Education, in the view of these persons, is of value inasmuch as educated men are, after all, the ruling class; they are here, as in every other country, the power behind the throne. Nor should any man speak lightly of this education. The desire to secure influence and power among men is not unbecoming to a noble nature. We hear much of the anxieties and cares and toils of great wealth and of high position, but these things represent power, and he who wields power beneficiently rises to new and great enjoyments. The scepter of such empire may be heavy for the hand that wields it, yet none but the ignoble would cast it down.

But there are those who take another and, I think, a wider, more comprehensive, and more just view of the aim and the value of education. It is that view which has regard to the nature of man, who was created but a little lower than the angels, and who has faculties and powers to be trained and developed with no reference to bread-getting, or even to wealth or power or high place among men. Without discrediting the education which has practical or gainful ends in view, we believe there is a sense in which the student is an end unto himself; and within the wide and varied scope of what we call education, there should be methods and subjects which have no direct or immediate reference to what are called practical ends, but which aim to develop those faculties in the possession and use of which man rises to the highest sphere of dignity and enjoyment. This is what we call liberal education—the education that after all is best fitted to the nature of man in view of his personal immortality which belongs to this life as well as that which is to come, and by which he is distinguished from the brutes that perish.

Now, the definite aim of the primary school—useful and even necessary in its place—is to instruct; it is to impart practical knowledge. Of course, if the teacher be skilful and wise (as all teachers should be) it will include training and development; but this is only incidental to the main objects in view. The child is taught reading, writing, and arithmetic; of these he has immediate and urgent need, whether he goes on to make broader acquisitions in other schools, or close his books to engage in the busy activities of life. The same thing is true of the technical or professional schools.

The student is taught what will be of practical use to him as a lawyer, a physician, an engineer, or whatever else may be the occupation or profession in life he has chosen. All mental or moral discipline, all training of the higher faculties, all development of character is still subsidiary and incidental in this education—the aim of which, as in primary instruction, is to impart that which is useful and practical.

And hence the desirableness or necessity of distinct and separate studies with different aims and, to some extent, different methods, which, while necessarily including much that is useful and practical, has for its primary object the development of the higher and better nature of the man that is within us. And this is the aim of the college, which has therefore its important and necessary place in our system of education. The college keeps in view the two aims of all education, viz., instruction and development, but it reverses them in the order of importance from that of the primary and technical schools, and of all schools for special instruction.

The advocates of liberal education do not claim that it will produce grapes from thorns or figs from thistles. There are men so severely practical that the wisest thing to be done in their case is to teach them the multiplication table, and set them at work; others are so dreamy and emotional that liberal studies will develop in them only the aesthetic craze of the day. But all healthy and well-balanced natures will find in these studies both joy and strength.

In the practical schools of every grade the shortest and easiest way to learn what is set before the student is the best way. The child learns the alphabet that he may learn how to spell and then how to read; and the engineer learns the strength of materials and the laws of force that he may build a bridge; and the surgeon learns what may enable him to set a broken limb. All methods and appliances that save labor and time in the acquisition of such useful knowledge is therefore so much gain. But as the primary aim of liberal studies is development, and as the mind grows only in exercising its own powers, it is evident that to save labor (except ill-directed labor) defeats the very object in view. Therefore, as I have already intimated, the college differs from all other schools, not only in its primary aim, but also largely in its methods. It is really a mental gymnasium, and this indeed is the very name the Greeks give to their schools most nearly corresponding in aim to our colleges. He who seeks to strengthen and develop his mind in gymnasium, must practice many things for the sake of the practice; and so for the sake of the exercise the student goes down into the college palestra to wrestle with pure mathematics and the classics. The knowledge of these subjects is not a necessity for him in constructing a tunnel, or in drawing up a brief, or in carrying on mercantile
or manufacturing enterprises—though it may be said that, in addition to the formation of many character by liberal studies there has been developed in the exercises of this palace, a splendid group which in after years has its practical use when the robust athlete takes hold of any subject with which he must wrestle, either in his professional or business life.

And here, did time allow, I would like to discuss some of those questions which are still in debate even among the advocates of liberal education. For example, the proportion of time and labor that should be given to pure mathematics, which seems to lie most remote from any practical use in after life; to psychology and ethics, which have always held their place as high topics of discussion in all schools; to the modern languages and the natural sciences, which more nearly approach to the practical studies of the special schools. And I should have been glad to discuss the values and place in every course of liberal studies of the classical languages and literature, and to examine also what may be hoped for or feared by the friends of liberal education in the general introduction in all our colleges of a course of liberal studies leading to a different degree from that of B. A.—excluding the ancient languages, but aiming to secure by the use of the modern languages and literature, and with the employment of the old and approved methods of liberal teaching and the aid of modern philosophical research, the same kind and degree of culture as the old course, with its Greek and Latin.

And more important than all, as it seems to me, is the discussion of the question, how shall this liberal education be so infused with the principles and spirit of the great Teacher that the religious nature of man, as well as of his moral and mental, may have its full development.

But I forbear to enter upon these questions, and would merely point you to the existence of both of these courses of study (classical and scientific), not only in this college, but in the hundreds of colleges all over our land, as the evidence of the popular appreciation of liberal culture, and also as showing the substantial agreement of all college education in both the old and new course of study as to subjects and methods.

But I may not conclude even this brief meditation without noticing the reproach brought against liberal studies, that they serve only to make men of ideas—men who are not practical, who are not men of affairs. To these objectors, it is but the dream of the sentimental enthusiast that we should strive to attain unto the great ideal of the true, the beautiful, and the good, which is in the soul of every man; they regard as idle vaporing the language of Aristotle, that "the harmony of the celestial spheres should be echoed in the soul of an educated man." There is not enough of common ground upon which we can stand to seriously argue with such men. We meet their assertions with counter assertions from those trained in these studies, and who know that the life is more than meat. The silent halls of this college have known such men. One of the noblest and most gifted among these students but recently closed his books and went forth into the beautiful land that is afar off. Deaf to all sounds of earth he had yet heard in his soul this "celestial harmony." Writing to his sister, after he had given up his studies, through the weariness and exhaustion of long sickness, and while waiting for the final summons, he says:

"It will take away half the bitterness of death to have been allowed to learn something; to have obtained one glimpse across the hills and valleys, away off into that promised land of perfect knowledge, perfect love, perfect purity, for such I take to be the true result of study. The more one learns, the clearer does he see God's wondrous goodness, the closer he is drawn to all things holy."

And this noble youth was but one among many who, in "learning something," has drawn nearer to the great ideal. Are we not conscious of a restless discontent with our present capacities and attainments? Are we not all of us (in our better moods) striving to become purer and nobler than our present selves. And the sacred voice which is ever thus calling to us EXCELSIOR, is not the dream of the visionary nor the enthusiast. There is that which is true, and beautiful, and good, in addition to that which is practical and gainful. If liberal education, that leads up to the realization of this ideal is an education of ideas, then we assert that it is ideas which rule the world; they are the permanent forces in the world's development, and, as Schiller says, "all ideas must have been realized in knowledge before they can realize themselves in history." And we claim that liberally-educated men are not selfish enthusiasts or useless drones—rather are they the distributors of beneficial and powerful influences that affect the destinies of individuals and of nations. And this influence is not only for the age in which they live. Those scholars, remote from manufactures, and railroads, and shops, are like the base of supplies established along the line of an advancing host, and it is from them that society is strengthened and replenished at every stage of its progress in its upward and onward march till it enters the golden gates of the city of God.

The exercises of the day were concluded with the benediction by Rev. James H. Cutbert, D. D., pastor of the First Baptist Church.

At the close of the academic year, in June, degrees were conferred in accordance with the recommendations of presentation day.

ESTIMATES FOR NEXT YEAR.

The following estimates for the service of the fiscal year ending June
30, 1884, have already been submitted.

For the support of the institution, including salaries and incidental
expenses, and $500 for books and illustrative apparatus, and $2,500 for
general repairs, $55,000.

To provide enlarged accommodations for the use of students, and ad-
ditional hospital room by the construction of two small detached build-
ings, $10,000.

For the improvement and enclosure of the grounds, $5,000.

The first estimate is the same in amount as the appropriation for the
current year. The number of pupils will undoubtedly be somewhat
larger next year than it now is; but this will involve no increase in our
salaries and wages, and it is hoped that the prices of provisions may
be lower than at present, so that the increased number can be provided
for without the occurrence of any deficiency.

The estimates for improvements to our buildings and grounds, are to
provide for matters which will contribute very greatly to the well-being
of the institution.

The construction of the Boundary street sewer, now being carried by
our grounds, will leave our front in a condition which will necessitate
the erection of some substantial and permanent enclosure. It is ex-
pected that the section near us will be completed before next summer.
It would be desirable, therefore, to have the appropriation for the im-
provement and enclosure of the grounds made available during the
current fiscal year.

To the appropriation of $55,000.00 for the current expenses of the
institution for the current fiscal year, the following proviso is attached:
"Provided, That no more than $22,000 of said sum shall be expended
for salaries and wages." The directors are under the impression that
this provision of law must have been adopted by Congress without a
full understanding of the needs of the institution and the character of
the services that are required in doing its work.

From a careful examination recently made into the organization of
institutions similar to this, and on inquiry as to the salaries paid, it
appears that the number of persons employed in this institution is by
no means unreasonable, while the salaries are in no cases higher, and
COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

in many instances are lower than those paid to officers of similar grades in schools for the deaf, and in colleges for the hearing of the first rank, as well as in the educational institutions sustained by the government, and in the scientific branches of the public service. It is evident, from the comparison thus instituted, that if changes are to be made in the salaries paid here increased rates should be allowed in several instances.

A comparison drawn between the per capita cost of maintaining this institution and the Military and Naval academies will show that the pro rata expense in those institutions is about two and a half times as great as in this. And yet the period of instruction here extends over thirteen years, while at West Point and Annapolis it is limited to four, and the number of our pupils is less than one-half that in each of the establishments named; both these facts tending to increase expense in this institution in that they necessitate more classes and proportionally a greater number of instructors.

It is true that the cost per pupil in this institution is greater than in any of the State institutions for the deaf and dumb. But this is fully accounted for when it is remembered that the State institutions bear the same relation to our collegiate department that the primary schools of the country do to the colleges and universities.

A course of study is given here equal in grade and scope to that afforded in the best colleges of the land. Deaf young men from all parts of the country, who have graduated from the State schools, seek our college as the only place in the world where they can secure the higher education that their more favored brothers may find in the colleges of their own State or section.

And when the cost of educating the mute young men of our college is compared with the expenses incurred in behalf of hearing young men in ordinary colleges, it will be found that no charge of extravagance or unnecessary outlay can be justly brought against this institution.

If the proviso above referred to should remain in force, it would be impossible to carry the work of the institution through the present fiscal year with the means provided by Congress. A reduction of more than seven thousand dollars in our salaries and wages, if applied to yearly rates, would force many of our officers to seek positions elsewhere, which they could easily find, and it would be impossible to supply the places of such with experienced and capable persons.

Or if the reduction were to be made by stopping all salaries and all work at the time when the twenty-two thousand dollars shall be exhausted, our students and pupils would have to be sent home at great sacrifice of valuable time, our schools closed with the labor of the year incomplete, and all persons employed by the institution subjected to gross injustice.

In view of all these considerations, the directors do not hesitate to urge, respectfully but very earnestly, that the attention of Congress be called to this matter, with the hope that on further consideration the propriety of the repeal of the proviso may become evident.

CONVENTION OF AMERICAN INSTRUCTORS.

The quadrennial convention of instructors of the deaf and dumb in the United States and Canada was held at Jacksonville, Ill., in the State institution for deaf mutes during the closing week of August last.

There were more than one hundred and sixty delegates present from twenty-eight institutions. This institution was represented by Assistant
Professor Draper, Professor Gordon, Professor Fay, and Pres. Gallaudet, the latter being chosen president of the convention.

Many subjects of interest and importance in our work were discus
Many valuable suggestions as to methods of instruction were bro
forward. Abundant opportunity was had for that personal interc
of views and experience which is of equal if not greater worth than
reading of formal essays; and at the conclusion of the meeting it
agreed that no more satisfactory and helpful gathering of instru
in our profession had ever been held.

Every member of the convention left Jacksonville with a deep
lasting impression of the warm-hearted hospitality that had been sh
them by the able superintendent of the institution, Dr. Gillett, an
corps of assistants, and of the generous manner in which the st
State of Illinois had provided for the education of her deaf child

Among the numerous matters considered and acted upon by the
vention, the only one which claims a place in this report is the fo
ning series of resolutions relating to our college, the unanimous
n of which will be a source of gratification to all interested in
nt effort to provide the deaf of our country with collegiate training.

Prof. J. L. Noyes, of Minnesota, presented the following resolu
which was seconded by Dr. Thomas MacIntire, of Michigan, and u
monly passed:

Whereas the National Deaf-Mute College, in Washington, D. C., has re
great and efficient aid in advancing the cause of deaf-mute education in the st

Whereas the funds for the support of the college come from the National Tre
(as is proper): Therefore,

Resolved, That we, directors, superintendents, principals, and instructors in

...
of the United States, as provided for by law. Applications in behalf of children similarly afflicted should be made to the president of this institution.

ACTS OF CONGRESS CONCERNING THIS INSTITUTION.

In our Twelfth Annual Report, that of 1869, all the acts of Congress relating to this institution which had been passed up to the date of that report were published. The completion of the twenty-fifth year of the existence of the institution is deemed a fitting occasion for a similar publication. In the appendix to this report will be found a transcript of all legislation had in Congress concerning this institution from 1869 to the end of the last session of Congress.

In this connection attention is respectfully called to the fact that in the preparation of the Revised Statutes several important provisions of law relating to this institution do not appear in chapter five, title fifty-nine, as they ought to do, and the suggestion is offered that Congress take the necessary steps to have the needed amendments made to the Revised Statutes.

All of which is respectfully submitted by order of the board of directors.

E. M. GALLAUDET,
President.

Hon. Henry M. Teller,
Secretary of the Interior.

60 INT
APPENDIX.

ACTS OF CONGRESS RELATING TO THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB, PASSED SINCE MARCH, 1870.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1871.

For the support of the institution, including salaries and incidental expenses, and the maintenance of the beneficiaries of the United States, forty thousand and seven hundred dollars: Provided, That the number of students in the collegiate department from the several States authorized by the acts of March 3, 1867 and July 27, 1868, may be increased to forty; but no student now at said institution, coming from said States under said acts, shall be supported therein by the United States from and after the 30th day of June, 1871, and no student hereafter coming to said institution from either of said States under said acts, and this act, shall be supported by the United States during any portion of the time he remains therein.

For completion of the main central building ninety-four thousand and eighty-seven dollars.

Approved July 15, 1870.

AN ACT making appropriations for the legislative, executive, and judicial expenses of the government for the year ending June 30, 1872.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty thousand and five hundred dollars.

For continuing the work on the inclosure and improving and grading the grounds of the institution, six thousand dollars.

For necessary expenses in the erection, furnishing, and fitting up of the buildings of the institution, in accordance with plans heretofore submitted to Congress, eighteen thousand dollars.

Approved March 3, 1871.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1873.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars.

For continuing the work on the inclosure, and improvement and grading of the grounds of the institution, six thousand dollars.

To provide for payments due and unpaid on July 1, 1872, on the purchase by the institution of the estate known as Kendall Green, seventy thousand dollars; provided, That before the expenditure of any part of this appropriation, by proper deeds of conveyance, to be approved by the Attorney-General of the United States, all the real estate now owned by the said Columbia Institution for the Deaf and Dumb shall be vested in the United States, as trustee, for the sole use and purpose provided in the act, entitled "An act to incorporate the Columbia Institution for the Instruction of the Deaf and Dumb and the Blind," approved February 16, 1857, and the several acts amendatory thereof provided. That whenever Congress shall so determine, any part of said estate may be sold, and so much of the proceeds thereof as shall be needful for the purpose shall be applied to reimburse the United States for the expenditure herein provided.

Approved June 12, 1872.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1874.

For the support of the institution including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars.

Approved March 3, 1873.
AN ACT making appropriations to supply deficiencies in appropriations for the service of the government for the fiscal years ending June 30, 1873 and 1874.

To enable the trustees of the institution to pay the amount yet due on the purchase of the estate known as Kendall Green, ten thousand seven hundred and ninety-seven dollars and forty-six cents, to be expended under the direction of the Secretary of the interior.

Approved June 22, 1874.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1873.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars.

For continuing the work on the erection and fitting up the buildings of the institution, in accordance with plans heretofore submitted to Congress, twenty-nine thousand dollars.

Approved June 23, 1874.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1874.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars.

For continuing the work on the erection, furnishing, and fitting up the buildings of the institution, in accordance with plans submitted to Congress, forty thousand dollars.

Approved March 3, 1875.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1875.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars.

For continuing the work on the erection, furnishing, and fitting up the buildings of the institution in accordance with plans heretofore submitted, and for repairs on buildings already completed, forty thousand dollars.

Approved July 31, 1876.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1876.

For the support of the institution, including salaries and incidental expenses, the maintenance of the beneficiaries of the United States, and five hundred dollars for books and illustrative apparatus, forty-eight thousand dollars. And the accounting officers of the Treasury are hereby authorized in the settlement of the accounts of the disbursing agent for said institution to give credit to voucher No. 5, in the first quarter 1876, and for vouchers No. 41 and 58 in second quarter of the same year, said vouchers being receipts for moneys paid for fuel for use of said institution, if the said accounting officers shall find that said vouchers were for expenditures made for the benefit of said institution.

For the completion of the work on the erection, furnishing, and fitting up the building of the institution in accordance with plans heretofore submitted, and for repairs on buildings already completed, sixty-nine thousand five hundred and twenty-four dollars and sixty-two cents.

Approved March 3, 1877.

AN ACT to provide deficiencies in the appropriations for the service of the government for the fiscal year ending June 30, 1878.

For fitting up and furnishing the new buildings of the Columbia Institution for the Deaf and Dumb, being a deficiency for the fiscal year 1878, two thousand five hundred dollars.

Approved Dec. 15, 1877.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1878.

Current expenses Columbia Institution for the Deaf and Dumb: For support of the institution, including salaries and incidental expenses, and five hundred dollars for books and illustrative apparatus, fifty-one thousand dollars.
REPORT OF THE SECRETARY OF THE INTERIOR.

For furniture and repairs of fences and walks, five thousand dollars, which shall be immediately available.
Approved June 20, 1878.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1880.

Current expenses Columbia Institution for the Deaf and Dumb: For support of the institution, including salaries and incidental expenses, and five hundred dollars for books and illustrative apparatus, fifty thousand dollars.
Approved March 3, 1879.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1881.

CURRENT EXPENSES COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

For support of the institution, including salaries and incidental expenses, and five hundred dollars for books and illustrative apparatus, and two thousand five hundred dollars for general repairs, fifty-three thousand five hundred dollars: Provided, That when any indigent applicant for admission to the institution belonging to the District of Columbia, and being of teachable age, is found, on examination by the president of the institution to be of feeble mind, and hence incapable of receiving instruction among children of sound mind, the Secretary of the Interior may cause such person to be instructed in some institution for the education of feeble-minded children in Pennsylvania or some other State at a cost not greater for each pupil than is, or may be for the time being, paid by such State for similar instruction, and the sum necessary therefor is appropriated out of the sum above provided for current expenses of the institution.

For erection and fitting up a gymnasium for the use of the students and pupils five thousand dollars, and for the improvement and enclosure of the grounds of the institution, two thousand five hundred dollars; in all, seven thousand five hundred dollars.
Approved June 16, 1880.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1882.

CURRENT EXPENSES COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

For support of the institution, including salaries and incidental expenses, and five hundred dollars for books and illustrative apparatus, and two thousand five hundred dollars for general repairs, fifty-three thousand five hundred dollars.

BUILDINGS AND GROUNDS COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

For the completion and fitting up of the gymnasium, eight thousand two hundred and forty-two dollars and seven cents; for the erection of a farm barn, two thousand dollars; in all, ten thousand two hundred and forty-two dollars and seven cents.
Approved March 3, 1881.

AN ACT making appropriations for sundry civil expenses of the government for the year ending June 30, 1883.

FOR CURRENT EXPENSES OF THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

For support of the institution, including salaries and incidental expenses, and for books and illustrative apparatus, for general repairs and improvements, fifty-five thousand dollars: Provided, That no more than twenty-two thousand dollars of said sum shall be expended for salaries and wages.

FOR BUILDINGS AND GROUNDS OF THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

For the completion of the farm barn, two thousand dollars, and for the improvement and enclosure of the grounds of the institution, one thousand five hundred dollars.
Approved August 7, 1882.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the trustees of Washington's Manual Labor School and Male Orphan
COLUMBIA INSTITUTION FOR THE DEAF AND DUMB. 949

Asylum Society of the District of Columbia," incorporated by an act of Congress approved on the 13th day of June, 1842, be, and they are hereby, authorized and empowered, by deed or other instrument in writing, to transfer all their funds and property of every description to the "Columbia Institution for the Instruction of the Deaf and Dumb and the Blind," incorporated by an act of Congress approved February 16, 1857, on such terms as may be agreed upon by said corporate bodies, and incorporated in such deed or instrument of writing.

Sec. 2. And it is further enacted, That the said deed of transfer or instrument of writing shall be recorded in the recorder's office for land titles, in the county of Washington and District of Columbia, and the terms and conditions of said deed shall be as obligatory on said Columbia Institution for the Instruction of the Deaf and Dumb and the Blind, as if they had formed a part of its charter; and from the date of the record thereof, as aforesaid, the trustees of the "Washington's Manual Labor School and Male Orphan Asylum Society of the District of Columbia" shall be forever thereafter absolved from their trust, and the act of June 13, 1842, conferring upon them corporate powers and privileges shall be thenceforward repealed: Provided, That all the debts and mortgage liabilities of the said "Washington's Manual Labor School and Male Orphan Asylum Society of the District of Columbia" shall be transferred to, and assumed by, and be the debts of the said "Columbia Institution for the Instruction of the Deaf and Dumb and the Blind," which shall be responsible therefor, and suits at law or in equity may be commenced against said last-mentioned corporation the same as if said debts had been originally incurred by it.

Approved June 13, 1860.

STATEMENT CONCERNING THE EDUCATION OF THE BLIND IN THE DISTRICT OF COLUMBIA.

MARYLAND INSTITUTION FOR THE INSTRUCTION OF THE BLIND,

DEAR SIR: There are seventeen pupils in this institution who are beneficiaries of the United States, nine males and eight females, all of whom are making fair progress, while several of them are among the most promising of our scholars. Harry R. L. Johnson, Robert W. Swann, Wren Trammel, and Louisa Smith will complete their course here June 30, 1883.

In our literary department there are three grades, in which are taught reading, writing, spelling, geography, arithmetic, algebra, geometry, English grammar, history, natural philosophy, and physiology.

Our musical department is under the direction of competent teachers; instruction is given in rudiments of music, thorough bass and counterpoint. There are ten pianos, two organs, one of which is a large pipe organ with water motor attached, and various brass and stringed instruments used by our orchestra.

In the mechanical department the girls learn plain sewing, knitting, crocheting and the use of sewing-machines, of which we have Wheeler & Wilson's, the Domestic, Remington, Wilcox & Gibbs, and the Singer. The boys are taught piano-tuning and repairing, broom and mattress making and chair caning, and their shops are well supplied with the machinery best adapted to the blind.

One hour each day is devoted to light callisthenics by the girls. Careful attention is given to sanitary and hygienic rules. The table is abundantly provided with plain, wholesome food.

The institution is unsectarian and each pupil is required to attend such church as the parent or guardian designates.

Our aim is to send out graduates who having received a fair education and instruction in some useful occupation here may become useful members of society. The capacity of each pupil is carefully studied, and he or she encouraged to give special attention to such branches as seem likely to be most profitable to the learner.

Very respectfully,

F. D. MORRISON,
Superintendent.

E. M. GALLAUDET, LL. D.,
President Columbia Institution for the Deaf and Dumb.
REPORT OF THE SECRETARY OF THE INTERIOR.

REGULATIONS.

I. The academic year is divided into three terms, the first beginning on the Thursday before the last Thursday in September, and closing on 24th of December; the second beginning the 1st of January, and closing the last of March; the third beginning the 1st of April, and closing the Wednesday before the last Wednesday in June.

II. The vacations are from the 24th of December to the 21st of January, and from the Wednesday before the last Wednesday in June to the Thursday before the last Thursday in September.

III. There are holidays at Thanksgiving, Washington's Birthday, Easter, and Decoration Day.

IV. The pupils may visit their homes during the regular vacations, but at no other time, unless for special, urgent reason, and then only by permission of the president.

V. The bills for the maintenance and tuition of pupils supported by their friends must be paid semi-annually in advance.

VI. The charge for pay-pupils is $150 each per annum. This sum covers all expenses in the primary department except clothing, and all in the college except clothing and books.

VII. The government of the United States defrays the expenses of those who reside in the District of Columbia, or whose parents are in the Army or Navy, provided they are unable to pay for their education. To students from the States and Territories who have not the means of defraying all the expenses of the college course, the board of directors renders such assistance as circumstances seem to require, as far as means at its disposal for this object will allow.

VIII. It is expected that the friends of the pupils will provide them with clothing, and it is important that upon entering or returning to the institution they should be supplied with a sufficient amount for an entire year. All clothing should be plainly marked with the owner's name.

IX. All letters concerning pupils or applications for admission should be addressed to the president.

X. The institution is open to visitors during term time on Thursdays only, between the hours of 10 a.m. and 3 p.m. Visitors are admitted to chapel services on Sunday afternoons, at a quarter past three o'clock.

XI. Congress has made provision for the education of indigent blind and the indigent feeble-minded of teachable age belonging to the District of Columbia.

Persons desiring to avail themselves of these provisions are required by law to make application to the president of this institution.
